PROFILE

Enthusiastic Python Django Developer with a strong foundation in full-stack web development. Proficient in building responsive web applications using Python, Django, SQLite, HTML, CSS, and JavaScript. Adept at managing both frontend and backend development tasks, with a keen interest in learning and growing within the IT industry. Motivated to contribute innovative solutions as part of a dynamic team.

PROJECTS

E-commerce Website: "Flower Shop" ([Github](#)).

- Built a responsive e-commerce platform using Django, Python, HTML, CSS, JavaScript, and SQLite.
- Managed product data, user authentication, and secure order processing with a robust backend.
- Implemented dynamic features like real-time data fetching and a seamless checkout process.

Stone, Paper, Scissors Game ([Github](#)).

- Developed a single-player game using Python, Django, JavaScript, HTML, and CSS.
- Implemented 6-round gameplay with dynamic logic and an interactive UI featuring real-time result tracking.
- Stored player data and game results in a Django-backed database for analytics.

Research Project: Anti-tumoral Effects of Cisplatin and Vitexin

- Conducted research on the anti-tumoral effects of cisplatin and vitexin.
- Evaluated the efficacy of these compounds in inhibiting cancer cell growth and inducing apoptosis
